Examination of Application #09/839,222

1. Claims 1-54 of application 09/839,222, filed on 23-April-2001, are presented for examination.

Double Patenting Rejection

2. The non-statutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.3218 may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,487,012, issued to Topholm et al. on 23-January-1996. Although the conflicting claims are not identical, they are not

In re Application of: Topholm

patentably distinct from each other because the present invention and the patent are each directed to a system for designing and manufacturing a hearing aid housing comprising at least one part, i.e. a face plate and a shell, that is individually matched to the auditory canal of a user.

Claim Rejections under 35 U.S.C. § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4.1 Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Topholm et al., hereinafter Topholm, in U.S. Patent no. 5,487,012.

4.2 Topholm disclosed the invention as claimed, including:

the tracing of the shape of the auditory canal and conversion of the values obtained into digital form [col. 2, lines 46-48] (*receiving and processing auditory canal shape data*);

conversion of the digital representation of the shape into a three dimensional or multi-dimensional computer model of the outer shape of the otoplasty (i.e. shell) or adaptive earpiece [col. 2, lines 50-53] (*forming a three-dimensional model of the shell based on the data*); and

computer-controlled production of an otoplasty or adaptive earpiece, including the various components/functions, including a cover plate [col. 3, line 53], from the data obtained from the three-dimensional computer representation [col. 2, lines 59-62] (*outputting model data for production of the shell and the face plate*).

In re Application of: Topholm

Claim Objections

5. The remaining claims 2-54, are objected to for incorporating the rejection of claim 1 by dependency.
